in door opening solutions

# Why Choose Knock Down? Maximum Economy & Flexibility

Knock Down simply means that products are received unassembled in the field. The contractor can then decide when or where to install the product for the greatest ease and convenience based on their needs.

## It is about choices...

Choosing a door and its accessories is all too often a more involved process than you have time to pursue. The trained staff of professionals at Dominion Building Products can help you select the correct product for your needs with hundreds of different options.

## Maximize savings with Dominion's Custom Buying Program

For most customers we can streamline the ordering process by creating a Custom Buying Program. The program features the items that are exactly what you need for your repetitive order strategies to realize the economies of scale without carrying truckloads of inventory.

## Typical Hardware Options

Mortise Lock

Lever Lock

Various Hinge Types

Automatic Closer

Panic Device with Lever

Latch Guard

Lite Kits

Bronze Textured Skin

White Textured Skin
