The Right Choice

When a quality, economical window is required, the Dominion non thermal window is the choice. Dominion packs this window with features normally associated with much more expensive windows and offers the benefit of a complete program offering.

At Dominion, our non thermal windows are constructed with a commercial, solid aluminum frame that is fully extruded. Precaulked corners, prefinished head, sills and fins are color matched for a high-quality, professional finish.

Size Formulas

Minimum Panel Rough Opening

(Nominal Window Width minus 2-1/2")

X (Nominal Window Height plus 1/2")

Actual Window Dimension

(Nominal Window Width minus 2-1/2")

X (Nominal Window Height)

Notes

All window examples shown on this page are standard sizes. Special sizes available on request. Not all sizes available at all locations.

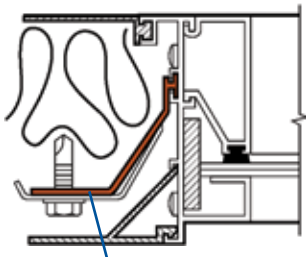

Stock or Custom Sizes Available

Whatever the size, style or glazing option you require, Dominion windows can satisfy all of your office or warehouse window needs. We can help you build a complete window program. From a more economical non thermal window to the value added thermal window with optional steel subframing including quick ship capabilities from multiple service centers across the country. **Only from Dominion.**

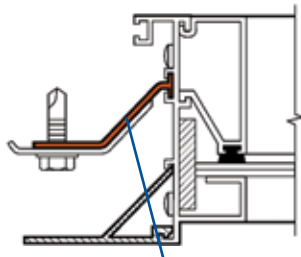

Choose the non thermal window

- Cost is the primary decision factor
- Location of window is warehouse/industrial
- Climate is even and warmer
- Mill finish is required or specified
- No framed opening required

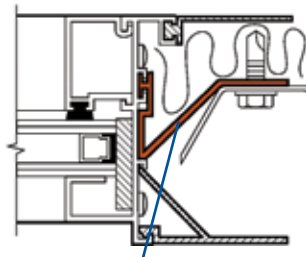

Trim Fins

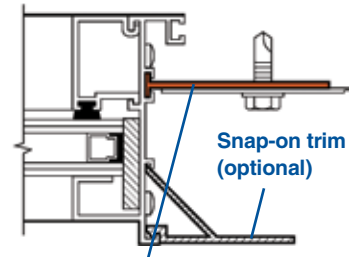

Regular 1-1/4" Panel Fin

3/4" Panel Fin

Architectural Panel Fin

Straight Panel Fin
