

Polystyrene Leaf

The Polystyrene leaf by Dominion is the choice for General Commercial duty. Heavy duty lock and hinge reinforcements surrounded by a minimum 20 ga. textured, galvanneal skin provides the needed elements for years of reliable service. Hemmed edges and mechanical interlocking seams give additional rigidity and durability. Pre-formed polystyrene provides respectable insulation and impact resistance. Economical and durable, this is a solid choice for most projects.

Polystyrene leafs are non handed.

- Commercial general duty
- 1-3/4" (44.4 mm) insulated full flush design - rated for light to extra-heavy-duty use.
- Polystyrene core provides insulation characteristics and resistance to impact
- A40 Galvaneal steel 18 or 20 ga.
- Mechanically interlocked, hemmed vertical seam
- 7 gage (4.2 mm) steel hinge reinforcements
- Inverted end channels welded to both face sheets
- R 6.5 Industry standard
- 18 or 20 ga. leatherette embossed skin
